### **DETAILED ACTION**

1. The IDS filed 10/6/2008 contains patents that do not relate to the subject matter of this application. They appear to be drawn to food making devices and hence do not relate to metal working die leveling. These references have been considered but are of little relevance.
2. No drawings were supplied with the application; drawings from the priority document have been used in the examination. A copy of the drawings should be supplied in response to this office action.
3. The amendment to the Abstract of the Disclosure on page 2 of the amendment of 10/6/2008 is not sufficient. An abstract provided on a separate sheet is required; it is not sufficient to state that it should be placed on a second sheet.
4. The disclosure is objected to because of the following informalities: The specification appears to be a literal translation into English from a foreign document and as such is replete with grammatical and idiomatic errors. Further the layout of the specification should comport with the following: The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A

COMPACT DISC.

(f) BACKGROUND OF THE INVENTION.

(1) Field of the Invention.

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

(g) BRIEF SUMMARY OF THE INVENTION.

(h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

(i) DETAILED DESCRIPTION OF THE INVENTION.

(j) CLAIM OR CLAIMS (commencing on a separate sheet).

(k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

(l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Appropriate correction is required.

5. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "top guide groove" (claim 4) must be shown or the feature canceled from the claim. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

6. Claims 4-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 4 is incomplete and indefinite. The various elements set forth in claim 4 have no structural correlation and hence fail to set forth a complete and operative device. Claims 5-13 are dependent upon a cancelled claim (1) and are indefinite and incomplete, they have not been treated on the merits herein.
7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Russell '612.

Russell teaches (Figs. 4, 6, and 7) the claimed invention including a lifter plate 30, a wedge plate 25 having a recess or bore for receiving a screw 50, a support plate 15 with a top guide opening or groove, an upper positioning frame at 17/18, and an adjustment screw 50.

8. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Pearson et al. '873. Pearson et al. teaches (Fig. 9) the claimed invention including a lifter plate 113, a

wedge plate 50 with a recess (not shown) for receiving a screw 57/59, a support plate 110 with a top guide opening or groove, an upper positioning frame extending upwardly on either side of the support plate, and an adjustment screw at 57/59.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
